## SOFTWARE ENGINEER

A diligent, resourceful and highly motivated professional with a comprehensive software engineering background. Proven expertise in resolving bugs; adjusting server configurations; and maintaining development and production Linux-based servers. Recognized for strong proficiency in developing websites, as well as excellent analytical abilities in troubleshooting complex problems. Technical expertise in implementing Ruby on Rails, HTML, CSS and JavaScript modules.

### AREAS OF EXPERTISE

- Software Engineering
  - Website Development
  - Full Stack Development
  - Server Configurations
  - Front End/Back End Redesign
  - Troubleshooting
- 

### PROFESSIONAL EXPERIENCE

**COMP TRADING, BROOKLYN, NY**

2017 – PRESENT

**PRINCIPAL ENGINEER**

- Designed and developed various innovative websites, while also providing consistent site support.
- Created and maintained over a dozen Ruby on Rails apps acting as the Web Developer, Back End Engineer, QA Analyst and Project Manager.
- Built an extensive casino comp rewards program using Ruby on Rails which included a complex coupon generator and a comprehensive dashboard for the casino managers

**SEYA, NEW YORK, NY**

2018 - 2018

**FRONT END ENGINEER**

- Assisted in future plans and website signup flow
- Created multiple web components to replicate predetermined designs
- Integrated and perfected many Ruby on Rails controllers and models to align with my created templates

**DERING HALL, NEW YORK, NY**

2016 – 2017

**SOFTWARE ENGINEER/FULL-STACK DEVELOPER**

- Assisted in the design and development of a luxury furniture website.
- Self-taught Ruby on Rails and further enhanced my web development skills by building frontend templates in a fast-paced Ruby on Rails app
- Developed various improvements and functionalities that abided by the company's design template
- Implemented an intuitive drag and drop tool to help publishers organize their content on the Dering Hall website

**CONSUMER REPORTS, YONKERS, NY**

2014 – 2016

**SOFTWARE ENGINEER/FULL-STACK DEVELOPER**

- Maintain development and production Linux-based servers to enhance user experience.
  - Resolve bugs and implement updates to *consumerreports.org*, a website with 3 million annual subscribers.
  - Spearhead complete front-end/back-end redesign implementation for the website's search functionality.
  - Adjust Oracle Endeca server configurations to optimize search results for queries such as 'iPad'.
  - Use HTML, Javascript, CSS, Apache Velocity, XML, Java and Python to manage diverse components in Adobe CQ and Pipeline code bases; function as the company's Github account administrator.
-
